

# VPAT™

## Voluntary Product Accessibility Template®

### Version 1.3

The purpose of the **Voluntary Product Accessibility Template**, or **VPAT™**, is to assist Federal contracting officials and other buyers in making preliminary assessments regarding the availability of commercial “Electronic and Information Technology” products and services with features that support accessibility. It is assumed and recommended that offerers will provide additional contact information to facilitate more detailed inquiries.

The first table of the Template provides a summary view of the Section 508 Standards. The subsequent tables provide more detailed views of each subsection. There are three columns in each table. Column one of the Summary Table describes the subsections of subparts B and C of the Standards. The second column describes the supporting features of the product or refers you to the corresponding detailed table, e.g., “equivalent facilitation.” The third column contains any additional remarks and explanations regarding the product. In the subsequent tables, the first column contains the lettered paragraphs of the subsections. The second column describes the supporting features of the product with regard to that paragraph. The third column contains any additional remarks and explanations regarding the product.

***Section 1194.22 Web-based Internet information and applications – Detail***

**VPAT™**

**Voluntary Product Accessibility Template®**

<i>Criteria</i>	Supporting Features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Yes	We provide text equivalent for content we have control over and have reasonable text alternative.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Not supported	Please use a third party service to implement this

		feature.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	N/A	Please work with accessibility designer to provide Atypon with compliant design for implementation.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Yes	This feature is available to reasonable extent.
(e) Redundant text links shall be provided for each active region of a server-side image map.	N/A	Please work with accessibility designer to provide Atypon with compliant design for implementation.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	N/A	Please work with accessibility designer to provide Atypon with compliant design for implementation.
(g) Row and column headers shall be identified for data tables.	N/A	Please work with accessibility designer to provide Atypon with compliant design for implementation.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	N/A	Please work with accessibility designer to provide Atypon with compliant design for

		implementation.
(i) Frames shall be titled with text that facilitates frame identification and navigation	N/A	Please work with accessibility designer to provide Atypon with compliant design for implementation.  Also, content and advertisement providers need to provide Atypon with compliant markup.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	N/A	Please work with accessibility designer to provide Atypon with compliant design for implementation.
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	N/A	There are no such pages in Literatum.
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	Yes	This feature is available to reasonable extent however some functionality may degrade without scripting support.

<p>(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).</p>	<p>N/A</p>	<p>Please work with accessibility designer to provide Atypon with compliant design for implementation.</p> <p>Also, content and advertisement providers need to provide Atypon with compliant markup.</p>
<p>(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>Yes</p>	<p>This feature is available to the extent the design allows. Please work with accessibility designer to provide Atypon with additionally compliant design for implementation.</p>
<p>(o) A method shall be provided that permits users to skip repetitive navigation links.</p>	<p>Yes</p>	
<p>(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.</p>	<p>N/A</p>	

Note to 1194.22: The Board interprets paragraphs (a) through (k) of this section as consistent with the following priority 1 Checkpoints of the Web Content Accessibility Guidelines 1.0 (WCAG 1.0) (May 5 1999) published by the Web Accessibility Initiative of the World Wide Web Consortium: Paragraph (a) - 1.1, (b) - 1.4, (c) - 2.1, (d) - 6.1, (e) - 1.2, (f) - 9.1, (g) - 5.1, (h) - 5.2, (i) - 12.1, (j) - 7.1, (k) - 11.4.
